CUSTOM SERIES

Customize with Canon

The office typewriter that *you* customize, to fit your changing business needs.

AP800

Canon

ELECTRONIC TYPEWRITERS

The AP800 Custom Series: Canon introduces a self-designed concept that redefines the office typewriter itself. And makes it perfect for you.

The AP800 Custom Series is an invitation for you to make the typewriter of your dreams a reality. The secret: each AP800 Custom Series typewriter can be easily upgraded with a variety of hardware and features that you choose, to match your typing needs.

The AP800 Custom Series: a supermodel, top of the line professional office typewriter that you change along with your evolving business needs.

The beauty of the AP800 Custom Series is that it starts off with standard features that deliver extraordinary performance. For one thing, the keyboard is adjustable, and the AP800 Custom Series begins with automatic formatting feature plus a 700-character correction memory. Automatic line-framing, numeric punctuation and four-way centering: all are part of the basic framework of the very versatile Custom Series.

Starting off with the AP800 state-of-the-art electronic typewriter, you're always ready to move up to even more powerful text editing capabilities — whenever you need them. For example: Selective Mail Merge, for matching addresses to text stored in memory. And an "UNDO" key that restores text inadvertantly deleted.

The AP800 with a 2-line liquid crystal display (AP810), for example, enables you to add up to 63KB of text memory or even more with a plug-in Micro Floppy Disk Drive. There's also an electronic dictionary that automatically checks the spelling of 148,500 words.

The AP800 with an 8-line back-lit liquid crystal display (AP830) shows you Canon's exclusive Print Image Display: a miniature version of the page you're typing.

Or you can go all the way up to actual word processor capability by choosing the AP800 with a 9-inch, 25-line screen (AP850), with reversible black-and-white display — all on a base that tilts to your most comfortable angle.

And there are even optional Serial and Parallel Interfaces, so every AP800 can be used as a printer with your office computer or word processor.

The AP800 Custom Series is an electronic typewriter that's more quiet, more efficient, more versatile than anything you've ever seen before. And because it was designed knowing that as your business needs grow and change, your requirements in a typewriter must also change. Canon leaves it up to *you* to create the AP800 Custom Series electronic typewriter that's just right for your needs.
